

Nurse Profile

Tracy Reed RGN

Urology Nurse

Background

Tracy qualified as a nurse in 1992 in Doncaster. She went on to work in orthopaedics before leaving the NHS to work in a private hospital setting and a care home before returning to the NHS to work within the medical assessment unit. Tracy then went on to work with the health visiting team, where she became passionate about continence care and joined the continence link nurse forum before specialising in the field of continence in 2006.

Tracy spent the next 6 years working as the Continence Sister in Doncaster community before leaving the NHS in 2012 to pursue a career in the private sector, still within the continence arena as a nurse advisor and product specialist.

Tracy has an in-depth knowledge of products available on FP10 prescription and as a result is able to offer an UNBIASED choice of products, within the boundaries of prescribing formularies if applicable.

As part of the Manfred Sauer Care nurse team Tracy will work closely with her NHS colleagues and is able to provide support with hands on care for those patients who require assistance with their continence and/or urology needs. She is also able to offer training and support for other healthcare professionals, families and carers.
